SUMMARY

Computer Engineering student with hands-on experience organizing campus events, strong communication and collaboration skills, and a record of building AI-powered applications including a RAG chatbot, an offline LLM chatbot, and a real-time quiz app. Known for maintaining a positive and inclusive environment while supporting faculty and peers.

WORK EXPERIENCE

Himalaya College of Engineering — Volunteer **07/2026**

- Assisted in organizing campus events to enhance student engagement and participation.
- Supported faculty with classroom management and logistical arrangements for workshops.
- Collaborated with peers to maintain an inclusive and welcoming environment for all students.
- Coordinated volunteer activities, ensuring efficient communication among participants.
- Controlled and conducted Himalaya Exhibition 2026.

PROJECTS

Quiz Royale — Real-Time Two-Player Quiz Application **Team Project (Team of 4)**

- Built a real-time, two-player quiz application featuring AI-assisted question classification and genre matching.
- Collaborated with a team of 4 to design and develop the full application, covering both frontend and backend.
- Implemented backend logic for question handling, scoring, and match flow, focusing on accuracy and efficiency.

Text-to-Voice & Voice-to-Text Converter **Personal Project**

- Developed a two-way speech application converting text to natural-sounding speech and transcribing spoken audio back into text.
- Integrated speech synthesis and speech recognition APIs/models to handle both directions in a single tool.

Prompt-to-Image Generator **Personal Project**

- Built an application that generates images from natural-language text prompts using an AI image-generation model.
- Designed the interface for prompt input and image output, focusing on usability and quick iteration on prompts.

Offline Chatbot **Personal Project**

- Built a chatbot that responds to queries without an internet connection, using a locally hosted language model.
- Optimized the model setup for local inference, balancing response quality with performance on limited hardware.

RAG-Based Chatbot **Personal Project**

- Developed a Retrieval-Augmented Generation chatbot that retrieves relevant context from a knowledge base to generate grounded responses.
- Implemented the retrieval pipeline (embeddings and vector search) alongside the language model to improve answer relevance.

Portfolio Website **Personal Project**

- Designed and developed a responsive personal portfolio website to showcase projects, skills, and experience.

EDUCATION

Himalaya College of Engineering **Expected 04/2027**
Bachelor in Computer Engineering, Kathmandu, Nepal.

Nidi Secondary School & Indreni Campus **2020 AD – 2022 AD**
Higher Secondary Education (Science), Jhapa, Nepal.

Janata Secondary School **2016 AD – 2020 AD**
Secondary Education, Jhapa, Nepal.

New Hope English Boarding Secondary School **2007 AD – 2015 AD**
Nursery to Class 6, Jhapa, Nepal.

ADDITIONAL INFORMATION

- **Skills:** Positive attitude, Teamwork and collaboration, Organized and efficient, Problem-solving, Computer skills, Decision-making, Event planning.
- **Languages:** English (Professional Working), Hindi (Limited Working), Nepali (Native or Bilingual).
- **Certifications:** Gen AI and LLM Training, and AI and ML Training, both by Broadway Infosys (20 days each).
- **Awards/Activities:** Supervised a team of 19 staff members; collaborated with a team of 4 to build Quiz Royale; conducted Himalaya Exhibition 2026.
